## PROFESSIONAL SUMMARY

Transitioning from finance to web development, I bring a strong analytical mindset, problem-solving abilities, and attention to detail. I am skilled in the front-end technologies such as HTML, CSS and JavaScript. I have further honed my skills by working on many projects and solving Data Structure and Algorithm based questions on multiple platforms such as Newton School platform and LeetCode. I embrace continuous learning and stay updated with the latest trends. As a seasoned working professional, I have honed my ability to adapt quickly to diverse work settings, navigate complex challenges, and deliver results. This experience gives me a unique advantage in anticipating requirements, and seamlessly integrating into a team. In my previous role in finance, I frequently conducted online research which involved navigating numerous government websites to determine the exact expenses clients would incur when obtaining a mortgage. This experience has significantly enhanced my ability to effectively sift through documentation, locate critical details, and extract relevant information. Beyond technical expertise, my transition has taught me the value of adaptability and continuous learning. I'm excited to contribute my unique blend of skills and passion for innovation.
